EXPERIENCES

FRONT-END DEVELOPER

Ulfat E-commerce development company

Dec 2023 - Present

Zanjiretamin: Supply Chain Platform provides direct access to supply and demand, offering financial tools such as tailored loans, receivables financing, and securities to support businesses of all sizes.

Barhub: Optimizing supply, distribution, and production systems management is crucial for large enterprises. Advanced logistics solutions reduce costs, improve service quality, and enhance customer satisfaction despite high demand and operational complexity.

- Developed responsive interfaces with Vue.js
- Collaborated with teams to implement
- Debugged and tested existing codebases

FRONT-END DEVELOPER

Parnian web design school

Aug 2023 - Jan 2024

I began my journey into front-end development here, building my skills from the ground up. During this time, I worked on several projects, which you can explore on my [GitHub](#) profile.
